## 

Home.

### **Charge with Vision**

The Ocular Home EV Charging station combines a beautiful compact charging station with a class-leading LCD screen for live charging feedback so you can be confident in charging right every time

Move away from blank wall-boxes and start charging with vision.

#### Australian Owned

100% Australian-owned with Australian-based support. Be confident that your charging station is backed locally and that your warranty is held under Australian consumer laws.

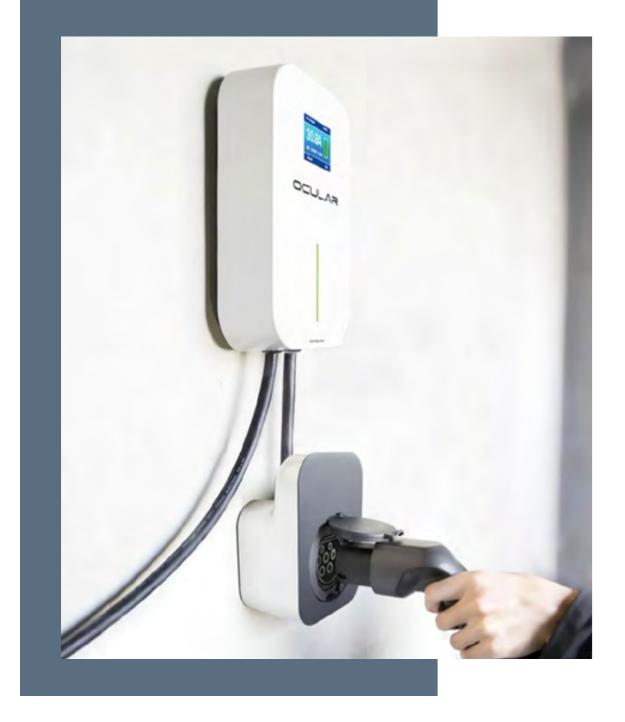

### 

#### Product Specifications

- LCD screen
- Slim, LED Display, IK10 rating
- Smart Phone App (Plus only)
- RCD and 6mA protection inbuilt for electrical safety
- Installation Friendly
- Cable length: 6 Metre Extended Cable for Trucks
- Mounting: Wall and Pole
- Safeguarded: 2 Year Warranty
- Weatherproof: IP66 Rating
- Overload protection

# **Ocular LTE**

# Simple To Use, Always Reliable

The Ocular LTE has been designed to create a simple user experience without compromising on advanced technology.

Ocular has incorported a LCD screen to show the live operating status at all times so you can rely on a fully charged car every morning. In combination with IP66 rating to protect against the Australian weather, the LTE is a home charger you can trust.

#### Simple To Use

The LTE home is a simple plug and play charger. With one simple step, you are charging your EV. Less hassel with all the reliability

#### **Multiple Variations**

Choose either a universal charging station or purchase with a 6m Type 2 cable hardwired onto the unit. Available in both single and three-phase.

#### Easy to Install

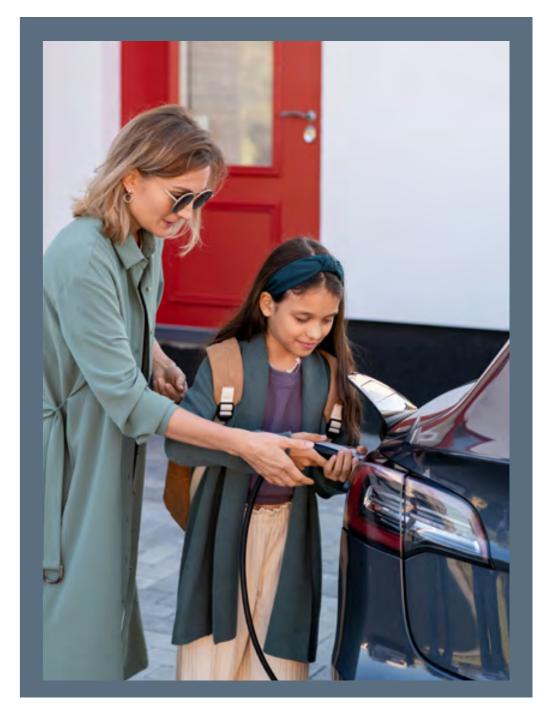

Easily installed with the unit preconfigured. The electrician just needs to mount and connect it to the electricity board of a home.

#### Charge Every EV in Australia

Every EV in Australia is compatible with this EV charger, including Tesla. We understand that people don't keep the same EV forever and your EV charging solution should provide you with the flexibility to upgrade or add more EVs to your home.

|                              | SPECIFICATION                |  |
|------------------------------|------------------------------|--|
| Input & Output               |                              |  |
| Input voltage/Output voltage | AC 230V/400V                 |  |
| Input frequency              | 47~63Hz                      |  |
| Max. output power            | 7.6KW(1 Phase)/22KW(3 Phase) |  |
| Max. output current          | 32A                          |  |
| Charging interface type      | IEC 62196-2, SAE J1772       |  |

**Ocular LTE Plus** 

The Ocular LTE Plus is the next generation of EV charging for homes. Its Intelligent smartphone app makes it easy to understand energy consumption when charging.

You'll see charging sessions across the day and the amount of energy that's being used. Take full control of your charge by adjusting the charge by time of day. It's the ultimate way to maximise your use of green energy and lower charging costs.

#### **Be Informed**

With an easy to use app, you will stay updated on your charging session and get up to date data your live and past charging sessions.

#### Easy to Install

Easily installed with the unit preconfigured. The electrician just needs to mount and connect it to the electricity board of a home.

#### **Schedule Charging**

Plug and forget with an optimised WWcharging schedule. Adjust this at any time to make the most of your energy use.

#### Save Money

Take advantage of off-peak energy rates or utilise solar power and save money. Personalise a charging schedule to run an EV with the lowest costs possible.
